# ABOUT US

**PolarisMet** is a modern stainless-steel brand built on precision, strength, and trust. We specialize in delivering premium stainless-steel materials engineered for performance and reliability across industries worldwide.

At PolarisMet, every product reflects our commitment to quality, consistency, and craftsmanship. Through advanced processing systems, strict **quality control, and efficient supply management**, we ensure materials that meet the highest industrial and export standards. From fabrication and engineering to construction and manufacturing, PolarisMet supplies the stainless steel that powers progress.

# OUR GOALS

## Goal 1

To continually enhance our range of sheets, coils, pipes, bars, and fasteners, serving as a one-stop stainless-steel solutions provider for all industries.

## Goal 2

To manufacture and supply stainless-steel materials that meet the highest global standards — ensuring strength, precision, and consistency in every product.

## Goal 3

To establish PolarisMet as a trusted name across international markets through reliable exports, timely deliveries, and long-term partnerships.

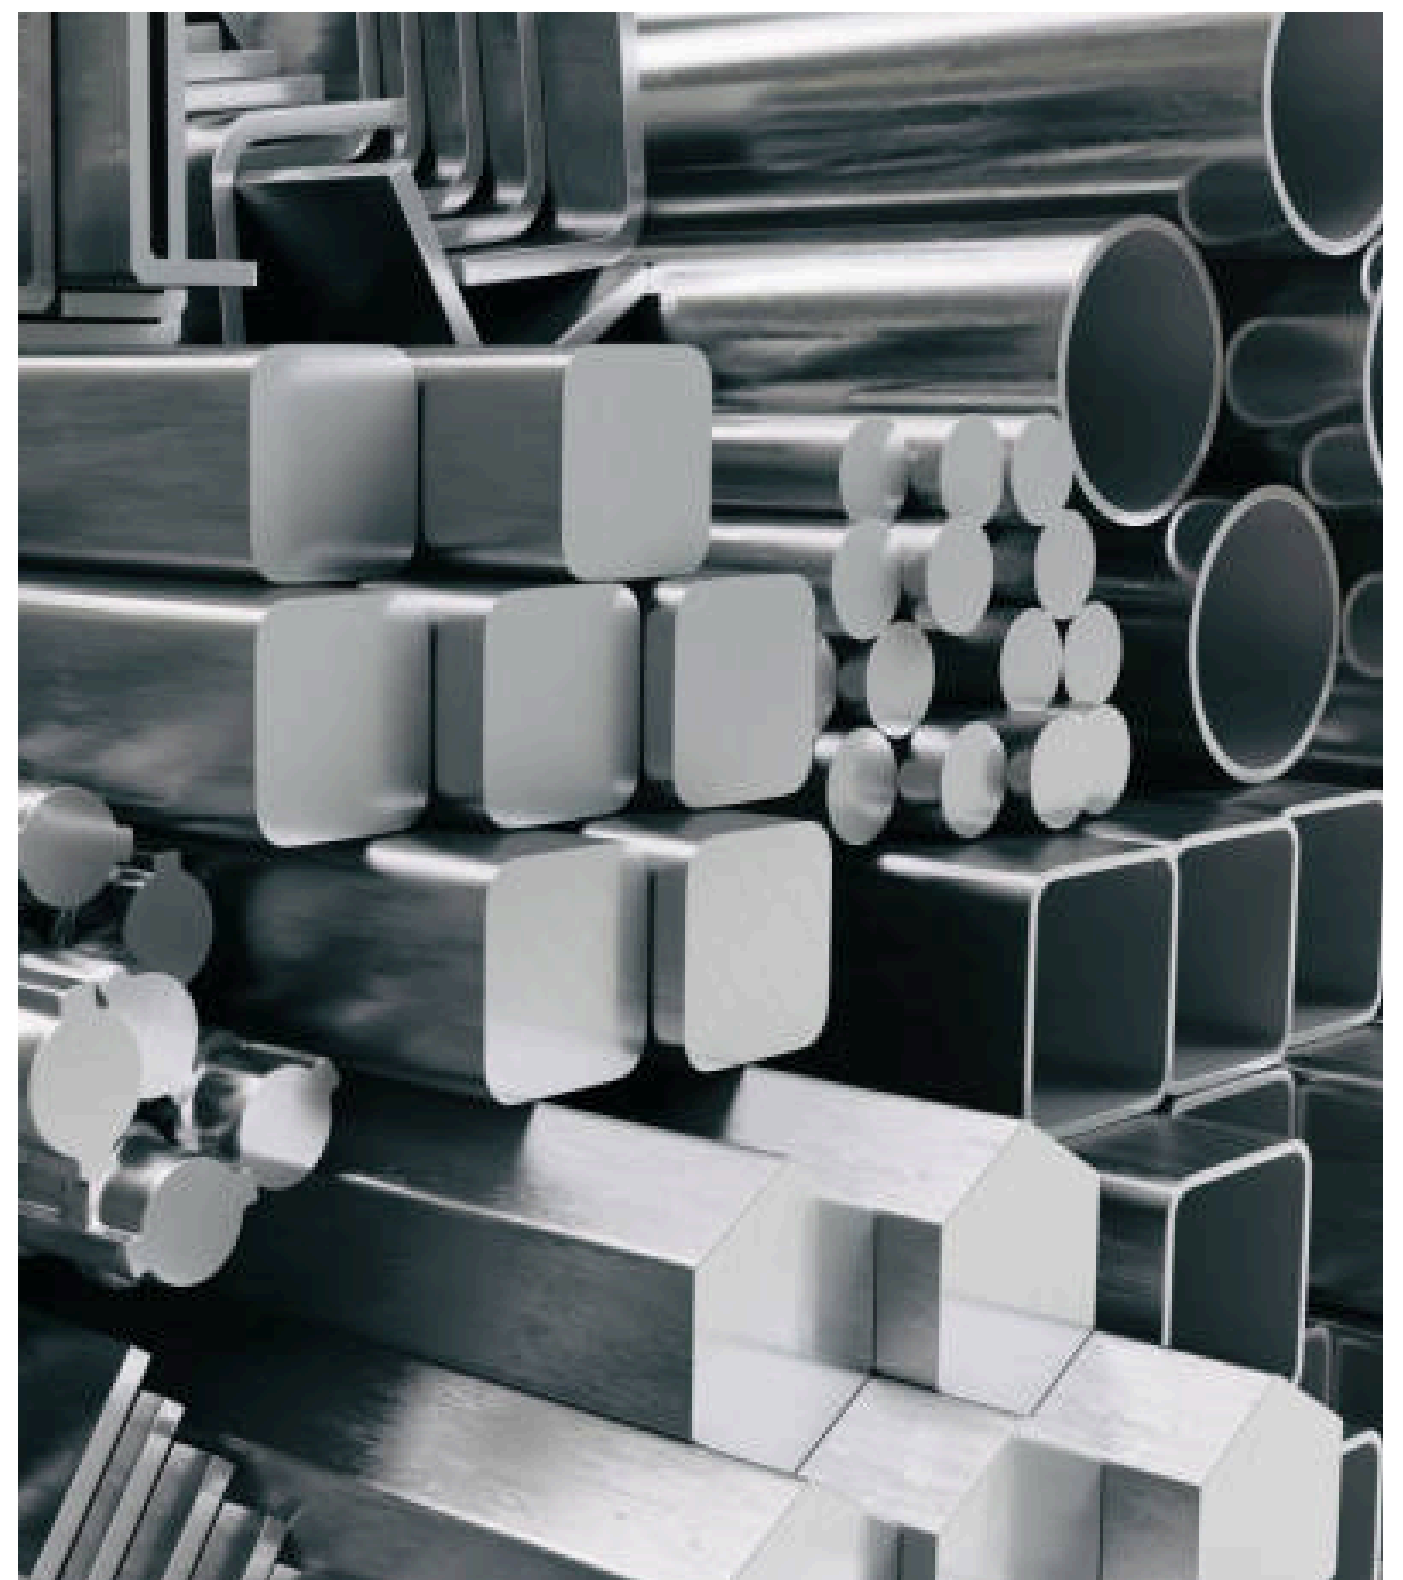

## Goal 4

To adopt advanced technologies and eco-conscious processes that support sustainable manufacturing and long-term industrial growth.

# PRODUCT OVERVIEW

At **PolarisMet**, we offer a complete range of premium stainless-steel materials designed to meet the diverse needs of modern industries. Every product is manufactured with precision, ensuring superior strength, surface finish, and corrosion resistance. Our materials are sourced and processed to meet international quality standards, making them suitable for applications in construction, engineering, fabrication, automotive, chemical, and export sectors.

## **Our Product Range Includes:**

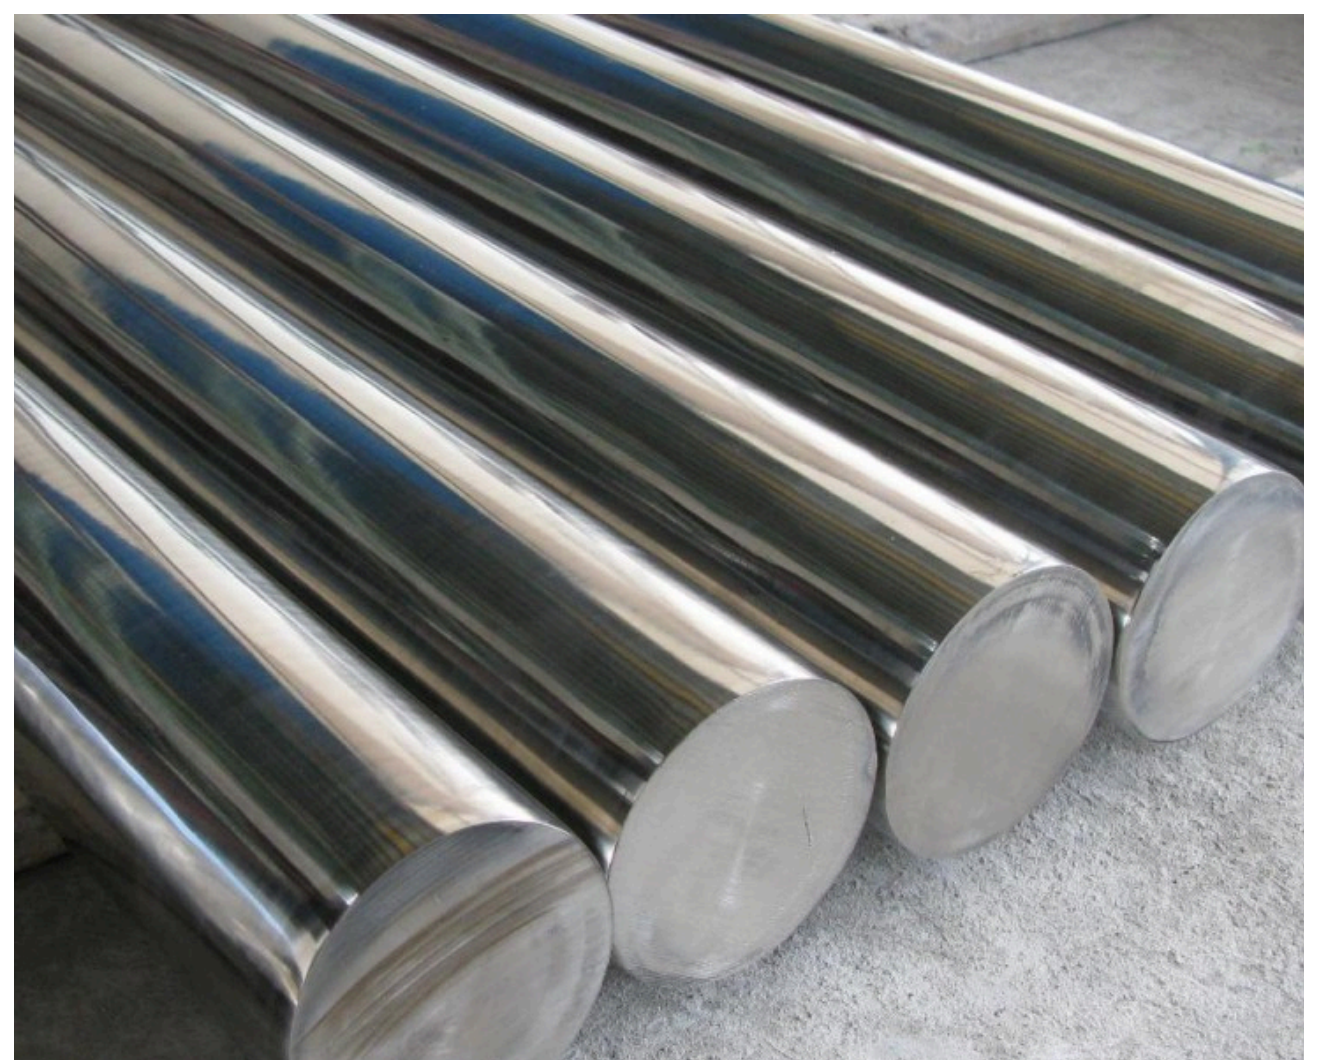

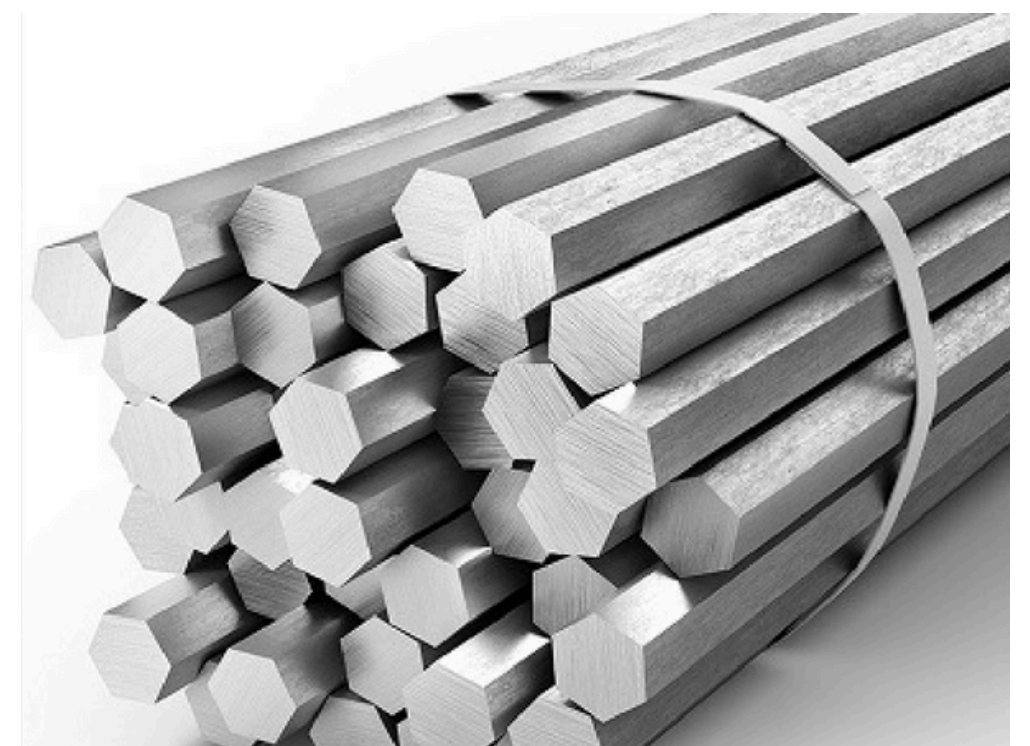

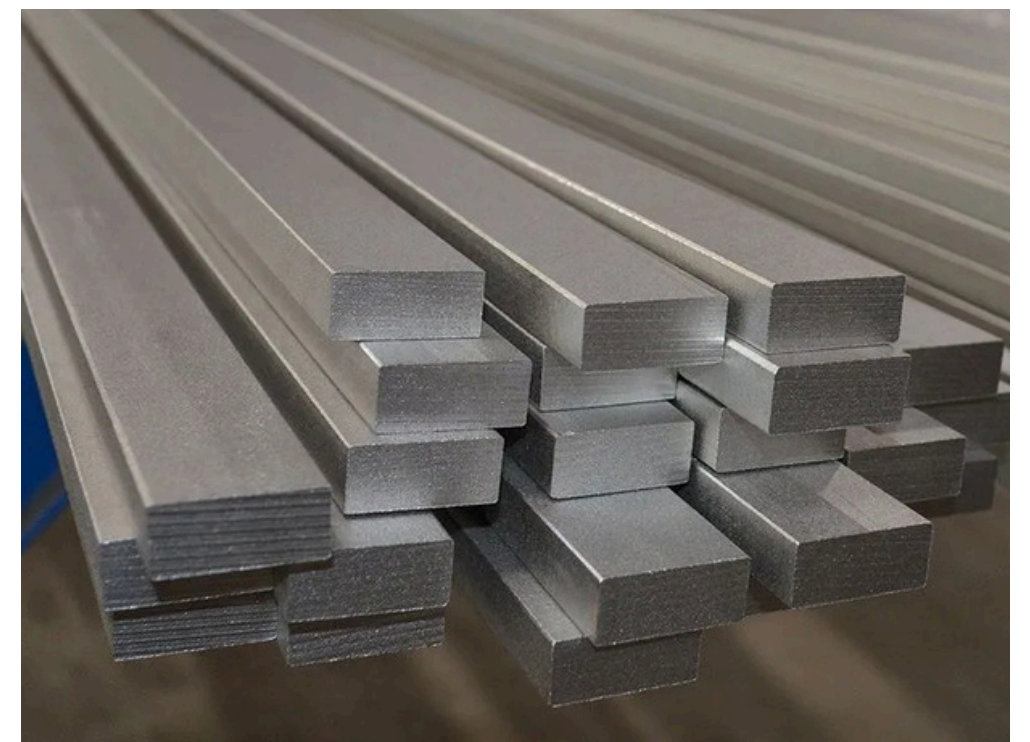

- **Sheets & Plates:** Available in multiple grades and finishes for fabrication and structural use.
- **Coils:** Precision-rolled coils with consistent thickness and surface accuracy.
- **Pipes & Tubes:** Seamless and welded options for industrial and decorative applications.
- **Bars & Rods:** Round, hex, and flat bars engineered for high-performance and machinability.
- **Wire Rods:** For fasteners, springs, and industrial wire products.
- **Fasteners:** Complete range of bolts, nuts, washers, and customized fittings for various sectors.

# BARS AND RODS

We offer a complete range of **Round, Hex, Square, and Flat Bars** in premium stainless-steel grades including SS 304, SS 316, SS 410, SS 431, and Duplex 2205.

These bars are known for their high strength, corrosion resistance, and dimensional accuracy, making them ideal for engineering, fabrication, construction, and machining applications.

Each profile is available in various sizes and finishes, ensuring reliable performance and consistent quality for every industrial requirement.

# SHEETS

We offer high-quality **Sheets and Coils** in stainless-steel grades such as SS 304, SS 316, SS 410, SS 431, and Duplex 2205.

Known for their uniform thickness, smooth surface finish, and corrosion resistance, these materials are ideal for fabrication, paneling, cladding, and general engineering applications.

Available in a variety of sizes and finishes to suit diverse industrial requirements.

---

# FASTENERS

We provide precision-engineered Stainless Steel **Fasteners** including bolts, nuts, washers, screws, and custom fittings, manufactured in SS 304, SS 316, and Duplex 2205 grades.

These fasteners offer high tensile strength, corrosion resistance, and long service life, making them perfect for structural, marine, and mechanical applications.

# PIPES AND TUBES

We supply a comprehensive range of Stainless Steel **Pipes and Tubes** in grades SS 304, SS 316, SS 410, SS 431, and Duplex 2205.

Our products are available in seamless and welded forms, ensuring high strength, durability, and excellent flow characteristics.

---

# FLANGE

We offer a wide range of Stainless Steel **Flanges** in grades SS 304, SS 316, SS 410, SS 431, and Duplex 2205.

Available in Slip-On, Weld Neck, Blind, and Threaded types

---

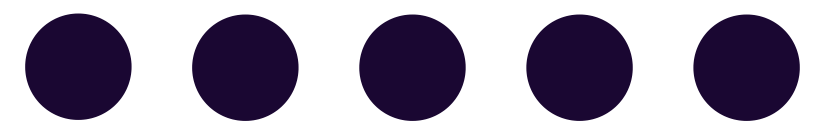

# ANGLE

We supply high-quality Stainless Steel **Angles** in grades SS 304, SS 316, SS 410, and Duplex 2205.

Available in equal and unequal sizes,
